

Alexandre DO-O ALMEIDA

Founding Engineer

0-to-1 Product, Startup Execution, Cloud Systems

alexandre@zqsdev.com | France (Remote) | [linkedin.com/in/alexandre-dooalmeida](https://www.linkedin.com/in/alexandre-dooalmeida) | github.com/aleqsd

SUMMARY

Founding engineer with 10 years building 0-to-1 product and platform systems from early buildout to scaled operations. Part of the cofounding team at **Y Combinator**-backed Jam.gg, contributing across architecture, product delivery, roadmap execution, recruiting, and team setup as the company grew to **2M users, 500K MAU, 60+ employees**, and a **\$12M Series A**. More recently, built CI/CD and automated testing infrastructure for **Sony PlayStation** emulators powering releases in the **PlayStation Plus Classics Catalog**. Hands-on across Go, TypeScript, React, Python, GCP, and AWS, with a bias for speed, product judgment, and execution in ambiguity.

SKILLS

Languages	Go TypeScript Python Rust C++ Java Bash SQL Lua
Frameworks	React Node.js Django FastAPI Flask Ruby on Rails Unity
Cloud / Platform	GCP Firebase AWS GitHub Actions GitLab CI Docker Kubernetes
AI / Tooling	OpenAI Claude RAG (Pinecone) Linear Figma Google/Slack APIs
Practices	0-to-1 Shipping Architecture Hiring Leadership Execution Agile

EXPERIENCE

Sony Interactive Entertainment (PlayStation)

Feb 2023 - Mar 2026

Software Engineer, Platform and Automation Systems

San Francisco (Remote)

- Built from scratch the **CI/CD and autotest infrastructure** for Sony PlayStation emulators, supporting the **Classics Catalog (PlayStation Plus)** on PS4 and PS5.
- Automated testing of **5,000+ retro games** across devkits and operating environments using **Python, GitHub Actions, AWS, and Google/Slack/Linear APIs**.
- Ensured release quality for **50+ PlayStation Classics**, including *Resident Evil*, *Tomb Raider Legend*, *Tekken 2*, and *Legend of Dragoon*, with some titles reaching up to **1M players**.
- Maintained **CI/CD pipelines** used by **15+ engineers** and worked closely with a **60+ person** QA organization on process and reliability improvements.
- Contributed through **Implicit Conversions Inc.** to porting and publishing retro titles on PlayStation, Switch, and PC, including *Micro Mages* and *Fear Effect*.

Jam.gg (YCombinator S20)

Mar 2020 - Feb 2023

Founding Engineer

San Francisco (Remote)

- Part of the cofounding team of a **SaaS cloud gaming platform** incubated by **YCombinator**; scaled the product to **2M users** and **500K MAU**, grew the company to **60+ employees**, and raised a **\$12M Series A**.
- Owned **platform architecture** and shipped core backend, frontend, and cloud features using **Go, TypeScript, React, Firebase, and GCP**.
- Owned **specs, priorities, and delivery** for major features such as Discord/Twitch integration, browser-based Twitch streaming, and a game upload and catalog system.
- Built and led the **product and QA teams**; managed **recruitment of the first 30 hires** and helped shape company culture, agile practices, and cross-team coordination.

Atos

Sep 2018 - Jul 2020

Backend Engineer / Innovation Project Manager

Aix-en-Provence, France

- Led a team of **6 developers** on **AI, IoT, and predictive maintenance** projects, designing custom **ESP32-based sensors** and building dashboards following **open data** standards with **Microsoft Azure**.
- Developed **Java** backend for a secure **geolocation tool** used by the **French Army**; also built a **Grafana dashboard** to visualize code quality for a team of **50+ engineers**.

Airbus Helicopters

Oct 2017 - Sep 2018

VR/AR Engineer

Marignane, France

- Built **immersive simulators** in **Unity (C#)** for **HTC Vive** and **Microsoft HoloLens** to train helicopter technicians.
- Developed a **Python/XML tool** for **Dassault** to generate and maintain technical documentation for helicopters.

CNRS (French National Centre for Scientific Research)

May 2016 - Jul 2016

Bioinformatics Engineer Intern

Marseille, France

- Extended **VisualTE**, a Java/Swing tool for studying the evolution of genetic transposable elements, with modules for **2D/3D structure analysis, multiple alignments, and phylogenetic visualization**.

EDUCATION

Master's Degree in Software Engineering - AI & Machine Learning

2016 - 2019

Ingesup, Engineering School

Aix-en-Provence, France

Bachelor's Degree in Cell & Molecular Biology

2013 - 2016

Aix-Marseille University, Faculty of Science

Marseille, France
