

Alexandre DO-O ALMEIDA

Platform / DevOps Engineer

CI/CD, Release Engineering, Developer Tooling

alexandre@zqsdev.com | France (Remote) | [linkedin.com/in/alexandre-dooalmeida](https://www.linkedin.com/in/alexandre-dooalmeida) | github.com/aleqsd

SUMMARY

Platform / DevOps engineer with 10 years building CI/CD pipelines, release systems, developer tooling, and test automation across gaming and software teams. Built the PlayStation emulator automation stack at Sony using Python, GitHub Actions, AWS, and API integrations, enabling continuous validation for **5,000+ games**, release confidence for **50+ PlayStation Classics**, and daily workflows for **15+ engineers** and **60+ QA testers**. Also brings cloud platform, engineering systems, and QA enablement experience from a **Y Combinator**-backed product scaled to **2M users** and **500K MAU**.

SKILLS

Languages	Python Go TypeScript Rust Bash SQL Java C++ Lua
Frameworks	FastAPI Flask Django Node.js React Pytest Unity
Cloud / Platform	AWS GCP Azure GitHub Actions GitLab CI Docker Kubernetes
AI / Tooling	Google/Slack APIs Linear OpenAI Claude RAG (Pinecone) Figma
Practices	CI/CD Release Eng. Tooling Test Auto QA Reliability

EXPERIENCE

Sony Interactive Entertainment (PlayStation)

Feb 2023 - Mar 2026

Platform / DevOps Engineer, CI/CD and Release Automation

San Francisco (Remote)

- Built from scratch the **CI/CD, autotest, and release infrastructure** for Sony PlayStation emulators, supporting the **Classics Catalog (PlayStation Plus)** on PS4 and PS5.
- Automated testing of **5,000+ retro games** across **console devkits and OS environments**, running continuously via scheduled jobs and commit-based triggers, using **Python, GitHub Actions, AWS, and Google/Slack/Linear APIs**.
- Provided non-regression coverage for **50+ PlayStation Classics**, improving release confidence for titles including *Resident Evil*, *Tomb Raider Legend*, *Tekken 2*, and *Legend of Dragoon*.
- Served as principal maintainer of **CI/CD pipelines**, developer workflows, and release processes used by **15+ engineers**; led internal **QA processes** and partnered with a **60+ person** manual QA organization.
- Contributed through **Implicit Conversions Inc.** to porting and publishing retro titles on PlayStation, Switch, and PC, including *Micro Mages* and *Fear Effect*.

Jam.gg (YCombinator S20)

Mar 2020 - Feb 2023

Founding Engineer

San Francisco (Remote)

- Part of the cofounding team of a **SaaS cloud gaming platform** incubated by **YCombinator**; helped scale the product to **2M users** and **500K MAU**, grow the company to **60+ employees**, and raise a **\$12M Series A**.
- Contributed to **cloud platform architecture**, engineering systems, and integrations using **Go, TypeScript, and React** across **backend, frontend, and cloud** systems with **Firestore** and **GCP**.
- Helped establish agile delivery, cross-team coordination, and engineering processes as the company scaled to **60+ employees**.
- Led **specs and delivery** for integrations, browser-based Twitch streaming, and a game upload and catalog system while maintaining the product roadmap.

Atos

Sep 2018 - Jul 2020

Backend Engineer / Innovation Project Manager

Aix-en-Provence, France

- Led a team of **6 developers** on **AI, IoT, and predictive maintenance** projects, designing custom **ESP32-based sensors** and building dashboards following **open data** standards with **Microsoft Azure**.
- Developed **Java** backend for a secure **geolocation tool** used by the **French Army**; also built a **Grafana dashboard** to visualize code quality for a team of **50+ engineers**.

Airbus Helicopters

Oct 2017 - Sep 2018

VR/AR Engineer

Marignane, France

- Built **immersive simulators** in **Unity (C#)** for **HTC Vive** and **Microsoft HoloLens** to train helicopter technicians.
- Developed a **Python/XML tool** for **Dassault** to generate and maintain technical documentation for helicopters.

CNRS (French National Centre for Scientific Research)

May 2016 - Jul 2016

Bioinformatics Engineer Intern

Marseille, France

- Extended **VisualTE**, a Java/Swing tool for studying the evolution of genetic transposable elements, with modules for **2D/3D structure analysis, multiple alignments, and phylogenetic visualization**.

EDUCATION

Master's Degree in Software Engineering - AI & Machine Learning

2016 - 2019

Ingesup, Engineering School

Aix-en-Provence, France

Bachelor's Degree in Cell & Molecular Biology

2013 - 2016

Aix-Marseille University, Faculty of Science

Marseille, France
