

Alexandre DO-O ALMEIDA

Software Engineer

Backend, Full-stack, AI-Assisted Development

alexandre@zqsdev.com | France (Remote) | [linkedin.com/in/alexandre-dooalmeida](https://www.linkedin.com/in/alexandre-dooalmeida) | github.com/aleqsd

SUMMARY

Software engineer with 10 years building backend services, full-stack product features, cloud systems, and developer tooling across gaming and tech. Shipped production systems in scale-up environments across Go, TypeScript, React, Python, AWS, and GCP, from helping scale **Y Combinator**-backed Jam.gg to **2M users, 500K MAU**, and a **\$12M Series A** to building engineering systems supporting **5,000+ games** and **50+ PlayStation Classics** at Sony. Brings strong testing practices, pragmatic AI-assisted development, and end-to-end product delivery.

SKILLS

Languages	Python Go TypeScript Rust C++ Java Bash SQL Lua
Frameworks	React Node.js FastAPI Django Flask Ruby on Rails Unity
Cloud / Platform	AWS GCP Firebase GitHub Actions GitLab CI Docker Kubernetes
AI / Tooling	OpenAI Claude RAG (Pinecone) Google/Slack APIs Linear Figma
Practices	Backend Full-stack Product Delivery APIs Integrations Testing Agile

EXPERIENCE

Sony Interactive Entertainment (PlayStation)

Feb 2023 - Mar 2026

Software Engineer, Backend Tooling and Automation

San Francisco (Remote)

- Built from scratch the **CI/CD, backend tooling, and automated test infrastructure** for Sony PlayStation emulators, used in the **Classics Catalog (PlayStation Plus)** on PS4 and PS5.
- Automated testing of **5,000+ retro games** across **console devkits and OS environments**, running continuously via scheduled jobs and commit-based triggers, using **Python, GitHub Actions, AWS, and Google/Slack/Linear APIs**.
- Ensured quality and **non-regression testing** for **50+ PlayStation Classics**, some played by up to **1M players**, including *Resident Evil*, *Tomb Raider Legend*, *Tekken 2*, and *Legend of Dragoon*.
- Principal maintainer and developer of **CI/CD pipelines** and release workflows used by **15+ engineers**; led internal **QA processes** and provided consulting for Sony's QA team of **60+ manual testers**.
- Contributed through **Implicit Conversions Inc.** to **porting and publishing retro titles** on PlayStation, Switch, and PC, including *Micro Mages* and *Fear Effect*.

Jam.gg (YCombinator S20)

Mar 2020 - Feb 2023

Founding Software Engineer

San Francisco (Remote)

- Part of the cofounding team of a **SaaS cloud gaming platform** incubated by **YCombinator**; scaled the product to **2M users** and **500K MAU**, grew the company to **60+ employees**, and raised a **\$12M Series A**.
- Core contributor to **platform architecture** and user-facing feature delivery using **Go, TypeScript, and React** across **backend, frontend, and cloud** systems with **Firebase** and **GCP**.
- Led **specs and delivery** for major product features including Discord/Twitch integration, browser-based Twitch streaming, and a game upload and catalog system.
- Created and led the **product** and **QA teams**; managed **recruitment of the first 30 hires** and helped shape agile practices and cross-team coordination.

Atos

Sep 2018 - Jul 2020

Backend Engineer / Innovation Project Manager

Aix-en-Provence, France

- Led a team of **6 developers** on **AI, IoT, and predictive maintenance** projects, designing custom **ESP32-based sensors** and building dashboards following **open data** standards with **Microsoft Azure**.
- Developed **Java** backend for a secure **geolocation tool** used by the **French Army**; also built a **Grafana dashboard** to visualize code quality for a team of **50+ engineers**.

Airbus Helicopters

Oct 2017 - Sep 2018

VR/AR Engineer

Marignane, France

- Built **immersive simulators** in **Unity (C#)** for **HTC Vive** and **Microsoft HoloLens** to train helicopter technicians.
- Developed a **Python/XML tool** for **Dassault** to generate and maintain technical documentation for helicopters.

CNRS (French National Centre for Scientific Research)

May 2016 - Jul 2016

Bioinformatics Engineer Intern

Marseille, France

- Extended **VisualTE**, a Java/Swing tool for studying the evolution of genetic transposable elements, with modules for **2D/3D structure analysis, multiple alignments, and phylogenetic visualization**.

EDUCATION

Master's Degree in Software Engineering - AI & Machine Learning

2016 - 2019

Ingesup, Engineering School

Aix-en-Provence, France

Bachelor's Degree in Cell & Molecular Biology

2013 - 2016

Aix-Marseille University, Faculty of Science

Marseille, France
